fuzzy set theory on a universe of granules (crisp sets) are considered. in this setting, the grade of a membership can be interpreted in the most elementary fashion. a grade of 1/2 membership means exactly one half of the granule (in a suitable measure) belongs to the fuzzy set. based on such views, fuzzy set theoretical operations can **3d model reconstruction from two orthographic views using ...** - one of the most outstanding advantages of using the fuzzy logic is that uncertainty in related equivalent elements in different orthographic views is reduced. another important feature of this method is that only two orthographic views are used to reconstruct the 3d model, while in previous methods, three orthographic views were used. **rewriting fuzzy queries using imprecise views -
